

CREATING A NEW PAGE

If your page should be in the main navigation, use “Add a top-level page or link.”

If you would like your link to be below one of the main navigation links, use “Add sub-link.”

If your page was previously created or if you want to link to a different url, you can use the drop down menu to select those options. If you need to create a new page, click the link to the right of the drop down menu.

You must give your page a title (the url will propagate itself with the page title; you may change this if necessary) and choose a template. Academic, Administrative and Centers templates exist alongside Basic templates that are used for the rest of the site.
